

Interactive Experience Project Plan

Project Details

Project Title	Awake
Experience Type	Fiction

Concept

The player wakes up on a cold table plugged into some mysterious system and has to explore the facility they are in and figure out what is happening.

Progression

Introduction

They learn that they are in some derelict facility that appears to be abandoned and are alone.

Development

If the player makes a wrong decision they could die and have to try again.

Conclusion

It could end with them escaping from the facility or ending up somewhere completely different.

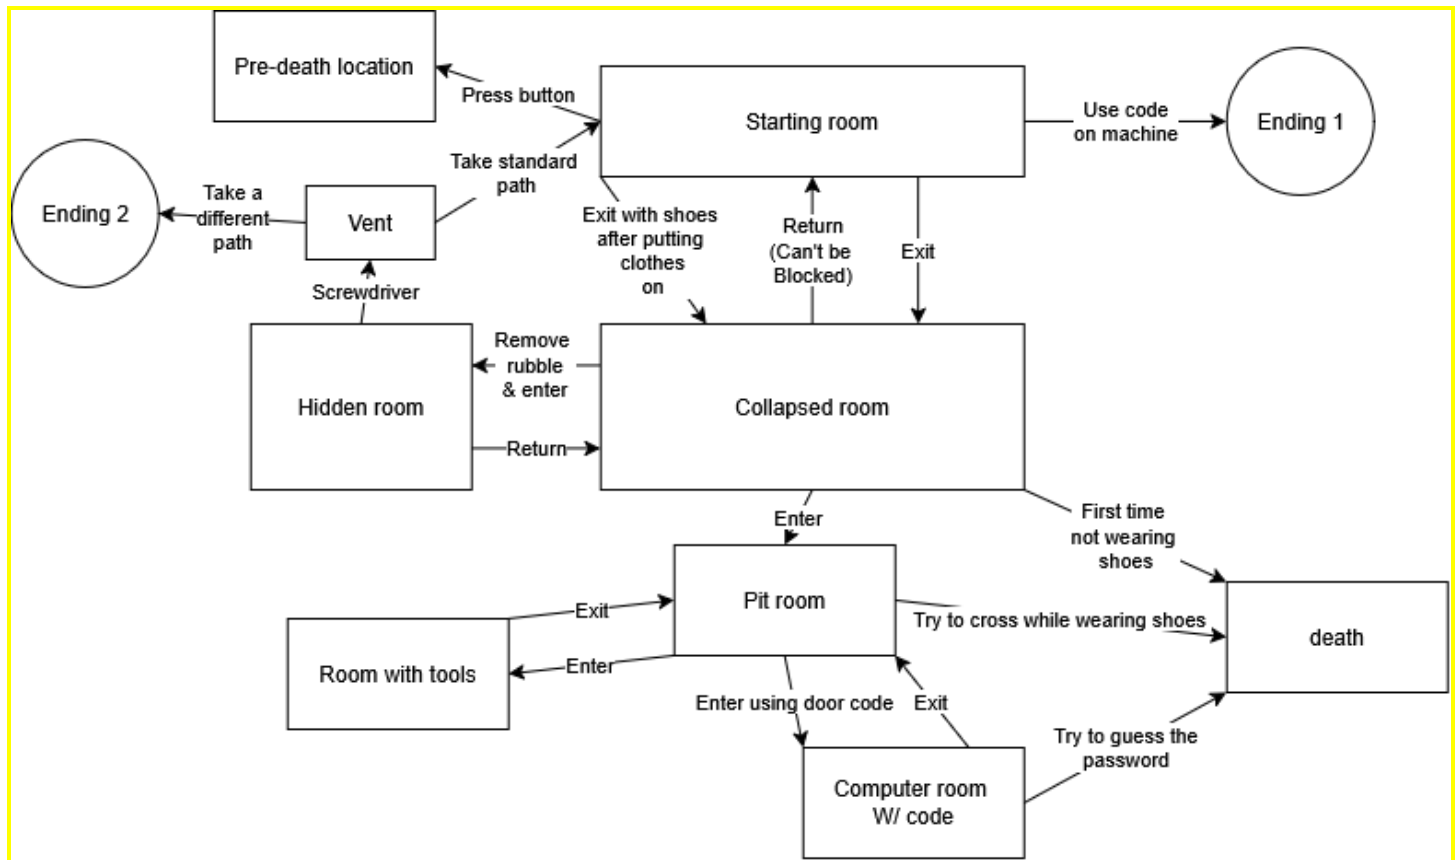

Major Choices

Situation	User Choices	What Happens Next
Wake up	Leave Room Put Clothes On Fall asleep	You go to exit the room You go to exit the room w/ shoes You wake up where you were previously
Collapsed room	Walk through room Return to previous room Try to remove rubble	die if you don't have shoes You return to the previous room You remove the rubble revealing a door
Pit room	Try to cross with shoes Try to cross without shoes Try to jump to the bottom of the hole	Die Pass Die
Computer room	Try to guess password Input code	Die Door unlocks

Data to Track

Information	Example Value	Why the Program Needs It
Items you have	"Shoes, Screwdriver"	To decide if you should be given certain options or not, and also how certain actions will play out.
position	A1	To figure out what you are able to do next
Position you died at	A1	To figure out where to put you if you fall back asleep

Flow

Minimum Viable Product (MVP)

Check the boxes to confirm that the experience plan would result in a Minimum Viable Product.

- ☐ Introduces the setting, player role, and goal clearly.
- ☐ Accepts and responds to user input.
- ☐ Tracks data or information.
- ☐ Changes what happens based on at least one earlier choice.
- ☐ Includes at least two possible endings.
- ☐ Provides clear instructions and valid choice options.
- ☐ Can be played from beginning to end without getting stuck.
